Multiplier Event 2 (E2)

Smart Job Hub (smartjobhub.arrange-ict.eu), is active now

Arrange ICT project trying not only to help startups find the right candidates and ICT-related talent find the right companies, we are also trying to establish the gaps that exist. Gaps in specific ICT knowledge so we can go back to universities to enrich their education programs with a data driven approach. So ICT talent is fully ready to jump in a high demanding startup dev function for example.
Wouldn't that be something?

For all these to happen though, we need data! To get the much needed data we need your help! Help us help the community by registering on the smart job hub here

<https://smartjobhub.arrange-ict.eu/roles/>

If you are a startup company looking for ICT talent, or an individual in ICT looking for the right match for your skills, pls register here
<https://smartjobhub.arrange-ict.eu/roles/> Let's help change the ICT education system together.

Workshop on Addressing Mega-Trends and Best Practices for Bridging the Skill Gap
